

Candidates for the Doctoral Council of the FSU Jena: DR.FSU

Legislative Period October 2018 to September 2019

Below are the 16 candidates for the next legislative period. With a maximum of 17 places in the DR.FSU all these candidates will be expected to be on the next council. Still your vote remains important and shows support and legitimizes your preferred candidates and the council. *We sincerely ask you to use your vote and make the voice of doctoral candidates at the FSU heard!*

The listed order is the same as on the voting form. It is determined by the filing date of the candidate application.

	<p>Susanne Spira no information provided</p>
	<p>Jonas Greif Faculty Faculty of Physics and Astronomy Institute Astrophysical Institute and University-Observatory PhD Topic Temperature Dependent Laboratory Measurements of the Far-Infrared to Millimeter Opacity of Carbonaceous Dust-Analogues</p> <p>PhD students are an essential part of the university. They are needed and responsible for research and lecture. Therefore it is important for the university as well as for the PhD students themselves to get engaged into the academic policy. Within this scope the following topics are important to me: the "Thüringer Hochschulgesetz" and the "Wissenschaftszeitvertragsgesetz" including the temporary employment.</p>
	<p>Patricia Luppe Faculty Faculty of Physics and Astronomy Institute Astrophysical Institute and University-Observatory PhD Topic Debris Disks around M-stars</p> <p>I am a PhD Student.</p>
	<p>Trim Lajqi no information provided</p>

Jana Schneider

Faculty Faculty of Law

I want to support and raise awareness of the further development of a constant exchange platform (like the doc_table) between all PhD students of the university (especially including the external PhD candidates) - regardless their different research specialties - to strengthen the relationship among them, to get in touch with each other, to get to know each other better and to benefit and learn from the different experiences and handling of the demands of a PhD project.

Isabelle Kutting

Faculty Faculty of Law

PhD Topic Christoph Menkes Kritik der subjektiven Rechte und Konzeption der Gegenrechte im Spiegel der Jurisprudenz

In order to consolidate what has already been achieved as well as to work on the steady development of good working and research conditions at our university, I would like to give the PhD students of the FSU Jena a voice. As a member of the board, I will support the DR.FSU in being a contact person and in promoting the cooperation between the different institutions in the interests of the PhD students. I am also particularly interested in the support of external PhD students.

We as PhD students have to actively shape the (university-)policy!

Lajwanti Dhaka

Deputies Aman Anand, Sandra Zemter

Faculty Faculty of Biology and Pharmacy

PhD topic Glucocorticoid receptor acetylation as a node in the metabolic stress signaling network

DR.FSU is one of the platforms which provides many opportunities for PhD students. It is an international organisation which offers many scientific and social events for students. Being a young researcher I always wanted to participate in an organisation which will be organised by PhD students and which will work for the PhD students. I found DR.FSU provides that opportunity where the voice of the students will be heard by even the university's president.

Michelle Maurer

Faculty Medical Faculty

Institute University Hospital Jena, Center for Sepsis Control and Care (CSCC)

Graduate School Jena School for Molecular Medicine – CSCC Research Training Group (RTG)

PhD topic Establishment of a microfluidic biochip-based gut-liver-axis

I have been a member of the student council at my former university in Marburg. In this way, I realized that we can actually change and achieve something as a group of people with the same interests, even though you often feel powerless as a student. Now I want to continue my work in the DR.FSU. The existence of a doctoral council is not a matter of course at German universities, which is why I am convinced we should use this chance to connect each other, share our experiences and find ways to improve unfavorable conditions of PhD students. We can actively participate in shaping the university and with that our own working environment, for example in the faculty councils. PhD students comprise a large group at this university, so it is absolutely vital that we are represented in relevant committees.

Alaa El Din Mahmoud

Faculty Faculty of Chemistry and Earth Sciences

Institute Center for Energy and Environmental Chemistry

PhD Topic Sustainable Synthesis of Nanoparticles and their Applications

DR.FSU enables PhD students to work as a teamwork. Regardless of our specialties, many issues and events can be discussed and organized from different perspectives and feedback. As a member of the DR.FSU, I support the networking and cooperation between different institutes and faculties. Such cooperation can strengthen the relationships between PhD students to overcome emerging problems with their studies and life. Furthermore, I highly recommend the intercultural exchange between PhD students. I believe that teamwork in DR.FSU promotes workplace synergy and improve academic conditions in aspects of research and life.

Olga Gildeeva

Deputy Mauro Aliverni

Faculty Faculty of Chemistry and Earth Sciences

Institute Institute of Geosciences

PhD Topic Ostracoda and Foraminifera as indicators of anthropogenic impacts

As a newcomer to Jena's PhD programs I would love to get involved and show how grateful I am for the opportunities it provided me with. Joining the DR.FSU will be a way to contribute to the university's diverse research community in return. Having a strong, interconnected platform of communication for young scholars and scientists is the foundation of a productive and successful exchange. Therefore, I believe I can serve the community best by bringing my enthusiasm and experience to the table, eager to help and support wherever I can.

Miles Mandel

Faculty Faculty for Chemistry and Earth Sciences

Institute Institute for Inorganic and Analytical Chemistry

PhD topic s- und d-Blockmetallkomplexe mit Bis- und Tris(pyrazolyl)methanid-Liganden

I am very proud to be a doctoral candidate at our historic *alma mater*, the Friedrich Schiller University Jena, and would like to make my contribution to support the excellent, international reputation of this institution. It is my fundamental believe that at its core this can be done by two initiatives: promoting and strengthening the sense of community among the doctoral students as well as by optimizing the conditions for successful research and education by continuous evaluation.

Christina Pohl

Faculty Medical Faculty

Institute Klinik für Innere Medizin I, Cardiology

PhD Topic Genexpressionsanalyse an peripheren Blutleukozyten und Endomyokardbiopsien von Kardiomyopathiepatienten mittels präamplifizierter RT-PCR am Beispiel von Tenascin C

As a medical student interested in graduating as a PhD, you often face difficulties in finding an appropriate topic and/or supervisor. Furthermore, the methods of scientific work are underrepresented in our curriculum. I'd like to simplify the procedure of finding a

Alexander Holzer

Faculty Faculty of Law

PhD topic Legal aspects of child marriage in the context of the Refugee crisis

I am a research assistant at the Chair of Private International Law. In my opinion, good research is very dependent on good research conditions. Different disciplines and research topics may have different needs. But careful supervision, transparent conditions in our contracts and good access to literature and sources is essential for all of us. I want to engage in a dialogue with the university and PhD-students themselves in order to provide a good environment for young scholars and scientists.

André Prater

Deputy Franziska Sieron

Faculty Faculty of Mathematics and Computer Science

Institute Institute for Mathematics

PhD topic Centers of blocks of defect groups

PhD students are often overlooked in university politics. For example, we have special seats for students and for university employees in the senate and faculty councils but none are reserved for PhD students. I fought for students' interests in high school politics on different levels since 2013. Now—as a PhD student myself—I want to fight for PhD student's interests. I think one main task of the DR.FSU is to look for problems of PhD students and be the voice to name those problems and help solve them.
